Achievements

Design Alchemist Award

Emoha Elder Care

2025 – 2026

Best Implementation & Creative Finisher

Hackathon

2026

Experience

Product Designer

Emoha Elder care

Sept 2024 – Present

- CRM Platform (WMS):** Led end-to-end, user-centered design of the organization's core CRM platform Sales Ops panel, Customer/Elder dashboards, Invoicing, Kanban task boards, and Medical & Care Plan workflows, partnering with product managers, developers, and business stakeholders to translate user requirements into effective digital solutions.
- Design Systems & Documentation:** Developed and maintained design documentation, design systems, and reusable component standards to support scalable, consistent digital experiences across web and mobile platforms.
- POS System:** Designed an end-to-end point-of-sale experience for 300+ users, that streamlined transaction workflows and reduced manual effort by 25–30% for field and operations teams.
- Mobile CRM:** Designed a mobile CRM panel used by business development teams for lead creation, task management, quotation sharing and revenue tracking,improving sales workflow efficiency by ~40% through iterative usability reviews and design optimization.
- Field Sales & Referrals:** Designed the field sales module enabling doctor lead generation and commission-based partner referrals; owned UX and functional QA, directly supporting revenue generation.
- Web Experiences:** Designed responsive Travel, Service, and Home care landing pages with search-optimized page structures contributing to an 18–22% increase in inbound leads and enquiries.
- B2B / Enterprise Design:** Delivered user-centered digital experiences for enterprise clients including ICICI, Google, Advantage Club, and ASLI, balancing user needs, business goals, and technical requirements across B2B properties.
- Accessibility-First App Redesign:** Led redesign of the Emoha consumer app for elderly users, conducting user experience reviews of existing flows to identify usability improvements, accessibility enhancements, and design modernization opportunities improving engagement across key user journeys.
- Sense AI:** Designed app flows and activity-tracking experiences integrated with smart devices, improving caregiver activity visibility by ~15–20% across mobile platforms.
- Nursing Officer Module:** Designed a comprehensive staff-management module covering reporting, scheduling, and operational workflows, improving efficiency for on-ground healthcare teams.
- Carer Referral Program:** Designed a referral-tracking and rewards module with a self-serve onboarding journey, driving caregiver acquisition expanding the active caregiver pool and significantly reducing TAT to deploy caregivers for customer requests.
- AR/AP Module:** Designed streamlined attendance, payments, and financial-tracking workflows for caregivers, reducing friction in day-to-day financial operations

UX Design Intern

ODN Digital Service

Apr 2024 – Aug 2024

- Designed a quality assurance tool for brands including Fossil, TATA CLiQ, and Babyshop, improving accuracy and efficiency of marketplace listings for 10+ brands.
- Led the redesign of the internal tool Connect, improving user experience and streamlining processes for 50+ daily users; conducted UX audits to inform the redesign.
- Performed competitive research for QUICK UP, analyzing 5+ competitor platforms to optimize marketplace listing strategy.

Growth Associate - Product

Cuemath

Mar 2021 – Apr 2023

- Conducted qualitative and quantitative user research to identify pain points and inform product decisions.
- Created wireframes and user flows in collaboration with product designers, translating research findings into user-centered design solutions.
- Built user personas and journey maps for the Malaysian market, informing UX strategy, design direction, and market positioning.
- Ran usability testing sessions to validate design decisions and iterate on prototypes.
